FOR IMMEDIATE RELEASE

ENTRÉ TECHNOLOGY GROUP ANNOUNCES PERFORMANCE FOR YEAR ENDED DECEMBER 31, 2005

Company Reports Seventh Consecutive Year of Growth

FORT WORTH, Texas -- January 23, 2006 -- Entré Technology Group, a leading provider of OEM technology and embedded computing solutions, reported a 26% increase in revenue and the highest gross margin in Company history for the fiscal year ended December 31, 2005. Because the Company is privately held, specific amounts were not disclosed.

Total revenues for the year ended December 31, 2005 increased 26% over fiscal year 2004 driven largely by the award of two OEM PC and Printer fulfillment contracts with a combined valued of over \$1,000,000. The services division, Cyber-Techs, also helped drive growth with a first quarter technology-refresh project valued at just over \$189,000 and the addition of an OEM PC fulfillment client with purchases of \$412,000 during the year.

"The exciting thing about the success we had in 2005 is that it has laid the foundation for continued success in 2006," said Bob Clayton, President of Entré. "Our clients in the OEM and embedded space are large medical diagnostic companies and laboratories that are relying on us to fulfill more and more of their embedded technology needs. We consistently compete against, and beat, the billion dollar integrators that cannot provide the responsiveness and account servicing that we can. Additionally, due to our strong financial performance, our clients know we have the resources required to keep their production lines supplied with embedded PCs and printer solutions. In our estimation we supply OEM and embedded products that help our clients generate an aggregate of nearly \$4 billion in annual revenue."

Entré Technology Group is a privately held company with two operating divisions. The Entré division provides OEM and embedded solutions to medical diagnostics companies and medical laboratories throughout North America. The Cyber-Techs division provides network IT services to companies based in the Dallas/Fort Worth metroplex. Each division is operated independently and each division reported revenue and gross margin increases for fiscal year ended December 31, 2005.

Fiscal Year 2005 Highlights

- Revenue increased 26% over fiscal year 2004.
- Gross margin increased for the seventh consecutive year setting an all-time Company high.
- Renewed an annual OEM PC and printer fulfillment contract with a Fortune 500 Biomedical company for the 15th consecutive year.
- Awarded a new printer fulfillment contract in the middle of 2004 with the full affect impacting all of 2005 revenues.

Portions of this document may constitute "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995. Although Entré Technology Group believes any such statements are based on reasonable assumptions, there is no assurance that actual outcomes will not be materially different. All forward-looking statements are based upon information available to Entré on the date this release was issued. Entré does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward- looking statements in this release relate to the Company's expected performance for the year ending December 31, 2005 and expected fiscal year 2006 revenues and the expectation of a strong start to fiscal year 2006 due to the Company's recent award of new contracts and the establishment of new clients in the medical lab market. Factors that may cause the actual results to be materially different from the future results expressed by the forward-looking statements include, but are not limited to: changes in general economic, medical and business conditions; changes in OEM and embedded technology; warranty and product liability claims; governmental regulations and environmental matters; competitive conditions within the industry; the availability of capital to the Company on favorable terms; and the Company's ability otherwise to successfully effect its other growth strategies.
