## HS320T

### Specifications

#### Performance

- 56k bps modem
- RTS buffer compression technology

#### Compatibility

- All major LIS systems, travel systems, & communications software applications.
- All major fax-send applications

#### Physical

- Size (WxDxH) = 15.7" x 13.6" x 4.6"
- Weight = 16 lbs.

#### Warranty

- 1-Year limited warranty: parts & labor

#### Manageability

- remotely programmable
- remotely upgradeable
- customizable script processing
- remote diagnostics
- log of received reports

#### Security

- answer back memory

#### Convenience & Functionality

- reprint last transmission
- Up to 4 alignment forms
- real time clock

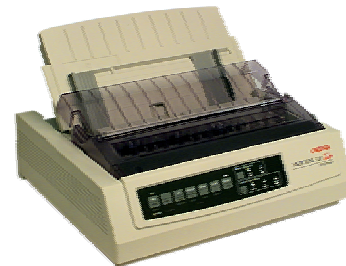

#### Entré Technology Group

Buy your Oki Brand  
ribbons from Entré  
and we'll double the  
printer warranty\*

### Rugged, Tough, Stable!

Engineered for the diverse and demanding needs of remote printing environments, the HS320t is a rugged remote printer based on traditional dot matrix technology. Precision engineering for high performance in heavy volume locations coupled with one step setup means reliable, fast, error-free printing you can count on. The HS320t sets the standards for remote printing.

### Plug-and-Play Compatibility

Right now, thousands of RTS printers are receiving reports from hundreds of different host systems in the medical, emergency, hospitality, food service, and locator service industries. Each device is configured on the assembly line to work with your specific system. We can even test sample transmissions with your host system before shipping the product to you. When the printer arrives at your remote location all that is required to do is Plug it in and let it Print.

### Information Mover

The HS320t features an auto-adjusting 56k internal modem and RTS's exclusive compressed buffer technology. Field performance shows that a 10 page transmission using RTS's remote printing technology takes under 15 seconds to transmit and receive. Move your data and reduce your phone time with the HS320t.

### Multipart Forms

The HS320t can handle up to 6-part, custom preprinted forms, plus it stores up to four form alignment patterns in memory. Use special buttons to pause and realign forms during printing to reduce paper waste. Reprinting is not a problem since data is stored in memory until the next transmission is received.

\*See your account manager for details.
