### Now Any Printer Can be a Remote Printer!

With a LineLink<sup>3</sup> and a USB cable any printer can now have all the features of a remote printer. Our LineLink series supports data, fax and form overlays. We do it all with the advanced technology inside the LineLink<sup>3</sup>. We can even switch between receiving data and receiving faxes *automatically!*

#### Smart Embedded Forms

Say "goodbye" to preprinted forms and "hello" to embedded forms. The LineLink<sup>3</sup> can store unlimited embedded forms and automatically overlay the correct form based on the data transmitted. Each form can be designed with special formatted data fields to generate precise registration of the data in the document.

#### Plug-and-Play Simplicity

LineLink<sup>3</sup> is specifically designed for instant compatibility with your existing network of remote printers. No changes to the host system are required, and no special configuration is needed to begin delivering high quality, professional-looking reports and faxes. Even if you are sending plain ASCII text, the LineLink<sup>3</sup> can automatically print the data on a customized, eye-catching embedded form designed to your specifications.

#### Exclusive Investment Protection!

The LineLink<sup>3</sup> can be upgraded to the full functionality of our flagship product, the NC-4802, with just the click of a button! All you pay is the price difference between the two products.
