What is a Remote Client?

Question & Answer

Q. What is a Remote Client?

A. A remote client is any device or application installed at your client locations to receive reports from your host.

Q. How Important is a Remote Client?

③

A. Results Delivery has been cited as one of the top 3 reasons your clients do business with you. Your results delivery network is only as good as the results delivery client you are using.

Q. Why should we buy the NC-4802?

A₁. *Proven Functionality*

The NC-4802 provides 100% of the functionality of the legacy remote printing devices that have been used for decades. We support data transfer via modem and can print the information with an eye-catching form overlay. We also support fax receive capability!

A₂. *Manageability*

An installed base of 1,000+ can be managed overnight with a click of a button!

A₃. *Upgradeability*

Fast forward to the diverse needs of today and the fast changing landscape of tomorrow. Even though there are numerous new methods of report delivery they all have one thing in common: they all run on a computer.

With an Intel microprocessor, 512MB of storage and an embedded Linux operating system, the NC-4802 is a computer... but with a much lower price, reduced footprint and nearly non-existent support requirements. The NC-4802 is the only safe investment in remote client technology that you can make today and have it grow with your needs tomorrow.

Q. Is it compatible with my current solution and host provider?

A. The NC-4802 has the capability; it just needs to be configured or programmed for the myriad of different ways each application delivers reports. Basic data transfer and auto print can usually be configured and tested in a day. More advanced web servicing could take longer depending on how quickly the host application can be ported to our operating environment.

Q. The NC-4802 sounds like it might be expensive. How much does it cost?

A. We believe when you compare our purchase price and total cost of ownership to other report delivery methods, you'll find that the NC-4802 provides the lowest cost of results delivery on the market. Call an account manager today to obtain more information and pricing.

Features & Specifications

NC-4802

Features

- Modem/FAX
- Form Overlay
- USB printing
- Configurable report archive
- Error notification
- Auto print on receive
- 10/100TX network adapter to support ftp, sftp and https

Developer's Edition

- If you are an LIS/HIS application developer or a hosted solution provider you can sign up for our developer's program and we'll let you customize the NC-4802 to your application.

Specifications

Connection

- 56k v.92 modem
- 10/100TX network
- 802.11b wireless (optional)

Dimensions:

- Size = 5.25"W x 5.5"D x 1.63"H
- Weight = < 1 pound

Compatibility

- All major LIS applications
- All major fax send applications

Warranty

- 2-Year limited parts & labor
- Extended plans available
- MTBF > 100,000 hours (11.4 years)

Technical

- 312MHz processor
- 512MB storage (256MB available)
- 64MB memory

(The outline of the box above is ACTUAL size of the NC-4802)

EntreTechnology
