All-In-One Laser Quality Remote Printer

The PowerPage series of printers accept both data and fax transmissions from the host system without needing an extra fax machine or line switching device. We do it all inside the printer and we can switch between receiving data and receiving faxes *automatically!*

Engineered for the diverse and changing needs of remote printing environments, the PowerPage series of remote printers combine sophisticated functionality with operational simplicity.

Smart Embedded Forms

Say "goodbye" to preprinted forms and "hello" to embedded forms. The PowerPage can store unlimited embedded forms and automatically overlay the correct form based on the data transmitted. Each form can be designed with special formatted data fields to generate precise registration of the data in the document.

Plug-and-Play Simplicity

The PowerPage is specifically designed for instant compatibility with your existing network of remote printers. No changes to the host system are required, and no special configuration is needed to begin delivering high quality, professional-looking reports and faxes. Even if you are sending plain ASCII text, the PowerPage can automatically print the data on a customized, eye-catching embedded form designed to your specifications.

Exclusive Technology Transfer Program

Do you have a fleet of RTS HS320T or RP320T dot-matrix remote printers that you want to replace with laser quality remote printers? If so, Entré can transfer the remote technology boards from your existing dot-matrix printers into the PowerPage 4.35, thus saving you hundreds of dollars. Ask your account manager for details today!

*See your account manager for details.

** Standard color is black. Also available in beige at no extra charge. Specify color at time of order. Available in two models: B4400 and B4600. Ask your account manager for details.
