EntreTechnology

Why Choose Entré?

Same Ownership, Same Management, Same Vision and Same Purpose since the day we opened for business in April, 1984.

Success, continuity and stability speak for themselves.

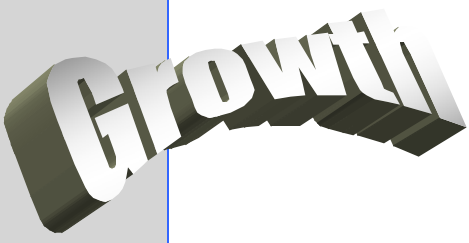
Some of the largest medical diagnostic instrument companies in the world use EntreTechnology for the OEM PCs and printers connected to the instruments in your lab.

You already use our products and know our quality.

Now you know our name.

Our Income Statement shows a profit and our Balance Sheet shows retained earnings.

Our management knows how to run a company that will be around for the long-term.



We still view the results delivery market as having a huge growth potential. It's simple math. ***You*** grow by adding provider locations. ***We*** grow by providing you the most cost effective method of delivering results to those locations.

*If **you** haven't reached your growth potential, neither have **we.***

Two Year Warranty on our printer independent devices (NC-4802 & LineLink)

Longer warranty == Better Quality? We think so.
