mission statement...

Our mission is to be known as a world-class provider of Embedded and OEM technology products and services to businesses and consumers throughout North America.

vision statement...

EntreTechnology will act as a seamless extension of your organization to deliver integrated solutions to your customers consistent with your objectives for product quality and customer satisfaction.

We realize we play an important role in your business model and must mold our products and services to meet your goals for customer satisfaction.

value statement...

EntreTechnology will be your sound business partner, drawing upon our vast resources to provide competitive advantages to your business.

- We will deliver more responsive account management.
- We are fully licensed and trained by the world's leaders in technology.
- We are committed to managing the lifecycle of your systems for easier integration with your Embedded or OEM product.

You have the right to demand a technology partner that is an integral part of your business. One that understands your challenges and will respond to your needs during critical times as well as day-to-day operations.

"[Our Company], for many years, has had a very good working relationship with Entré, and hopes to have many more. Keep up the good work."

Supplier Quality Engineer
Fortune 500 Diagnostic Company

Letter dated February 02, 1994 — *and still a customer to this day!*
